“HYGGE”

Pronounced “**hue-guh**”, Hygge is a Danish Word used when acknowledging a feeling or moment, whether it is alone or with friends, at home or out, ordinary or extraordinary as cosy, charming or special.

ABOUT US

THE BIRTH OF LOFT LIVING

In the early 1960s a new style trend began in the US where old warehouses were turned into living spaces. Solid wood furniture was mixed with steel, glass and fabric to decorate large open-plan living and work spaces for a young generation wishing to express their vision of a more sophisticated urban society.

THE EVOLUTION OF LOFT STYLE

The Loft style around the world today is a result of an inherent respect for classic furniture craftsmanship blended with the need for functionality and durability associated with industrial environments.

HANDCRAFTED

We handcraft all our indoor and outdoor solid furniture using traditional woodworking techniques. Each piece of **Danish Loft Design** furniture is wholly designed and built in our own factory.

DANISH QUALITY

At **Danish Loft Design**, we are not only dedicated to create loft style furniture we are also dedicated to delivering a quality that lives up to Danish and international standards.

EXTENDED WARRANTY

We offer our customers a five year warranty on our wooden furniture from the date of purchase as shown on invoice.

ENVIRONMENTAL AWARENESS AND SUSTAINABILITY

From an early stage in product development out engineers and designers review the raw material available before committing to shapes and sizes, resulting in minimal waste once we are in production – an expensive and time consuming exercise, however a necessary precaution in order to honour our ambition of constantly reducing our environmental impact. We strive to produce no more than 2-3% waste in wood and metal. Even after the finished products leave the sop, most of the **Danish Loft Design** collections, furniture and accessories are close to **99% recyclable**.

Local Valencian, Spanish and European suppliers and craftspeople will be out backbone when we create furniture and artisan accessories. By reducing the distance between materials, manufacturing and final end user, both our lead times and our environmental impact is considerably reduced. Wood and metal work will be carried out by local SME's where their skilled craftsmanship will add genuine “handcrafted” values to our designs.

WOOD MATTERS

Danish Loft Design uses only sustainable plantation and replanted wood with certification for place or origin – no rainforest wood is used, **only FSC certified wood materials**. Our designs allow for no more than 2-3% waste on wood, as all excess material is either incorporated into the product design or used for other pieces. All wood materials are treated with pure organic products such as Linseed oil or water based stains from Danish suppliers.

LOW WASTE METAL

Danish Loft Design incorporates industrial-grade metalwork from our carefully selected local suppliers. We are proud to do so with no more than 2-3% waste of metal as all scrap parts are recycled. All the metal we use for both furniture and accessories is powder coated without the use of harmful solvents.

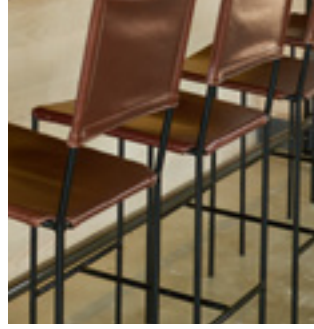

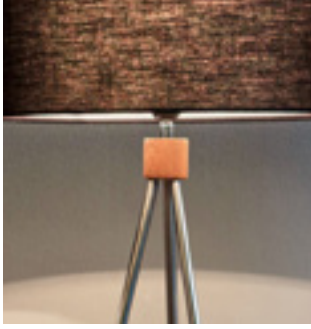

- Only FSC certified wood
- All wood materials are exclusively treated with organic products
- **2-3%** waste on metal
- **2-3%** waste on wood
- No use of solvents
- Most of our products, furniture and accessories alike are **99% recyclable**

The appeal of our products is
simple: we make high-quality
products that are built to last

At **Danish Loft Design** all materials are carefully tested
by our team of craftsmen, engineers and designers.
We offer a wide selection of wood, the finest leather
and industrial grade metal work.

The simplicity of design means we can produce high
quality, handcrafted and fully customizable products,
within the means of ordinary families.

FROM OUR CREATOR

STEVEN TYNAN

HEAD OF DESIGN, FOUNDING PARTNER

Born in Odense, Denmark, the later living in Copenhagen, Steven initially set out to pursue a career in the corporate world but consistently found himself heading up business related interior design projects, with many projects requiring specially designed furniture and interiors. Steven has always found himself most inspired and satisfied when creating, and for decades has been creating and building his own furniture designs.

After moving to Asia in 2004, Steven switched his professional attention to entirely focus on designing and project managing contemporary restaurants, bars and upmarket homes in Hong Kong and Thailand.

As a clear line and style of furniture matured, Danish Loft Design evolved and continues to evolve with an internationally-influenced style combined with the simplicity of Danish design. All in Loft style, combining metal and wood, with inspiration from around the world brought together by the strong guiding principles of the Danish design aesthetic.

“

We blend simple Danish design philosophies with the trend for loft-style living to create great pieces of furniture which take loft design to the next level.”
